Odoo Implementation Business Plan

A to Z Trading Company

Furniture Manufacturer and Retailer

Building one integrated system
to streamline operations,
improve accuracy, and
drive business growth.

Business Problem

Disconnected spreadsheets and tools

Lack of integrated tracking and costing

Multiple customer and supplier types

Need for real-time visibility and control

Business Analysis

Project Scope

IN SCOPE	OUT OF SCOPE
Inventory	eCommerce website
Manufacturing	Mobile app
Purchase	Custom modules
Sales	
CRM	
POS	
Accounting	
HR	

Delivering the core systems that power
A to Z Trading Company's furniture manufacturing and retail operations.

Work Breakdown

A clear nine-step approach to implement Odoo across A to Z Trading Company.

01 Company setup & general config

02 Inventory & Purchase config

03 Manufacturing config

04 Sales, CRM & POS config

05 Accounting config

06 HR, users & access rights config

07 Import master data

08 Test & validate processes

09 Prepare final delivery

Responsibility Plan

Implementation

Building the foundation for a successful Odoo go-live

01

Create & Install

Create Odoo database

Install required modules

02

Configure

Set up company details

Configure taxes and currency

Define warehouses and locations

Manage users and access rights

03

Import Data

Import customers and suppliers

Load products and BOMs

Add employee records

Import opening balances

Accurate setup and clean data create a **strong operational foundation**

Validation and Testing

Teams test their configured modules

Full-cycle end-to-end testing across all teams

Confirm processes match workflows

Log issues, resolve, and retest

01

Module Testing

Each team validates its module

02

Full-Cycle Testing

End-to-end tests across all teams

03

Issue Resolution

Log issues, resolve, and retest

04

Validation Complete

Processes align with workflows

Final Delivery

Project plan documentation

Odoo screenshots for key processes

Presentation slides

VBA code for automated slide creation
